THE WAY YOU LIVE ...

The world's population is growing fast. As cities grow, so does the demand for quality, comfortable living spaces. These and other demographic factors such as ageing and the increase of one-person households put a lot of pressure on the housing market these days.

As space and resources are often limited, especially in urban areas, the renovation and refurbishment of existing property is becoming more and more important.

8.

We're forced to live smaller and more densely, yet in the post-growth society we live in right now, people tend to embrace compact living as a lifestyle: we consciously choose better instead of bigger nowadays.

Wellness is very much alive in architecture. We're constantly looking for ways to make our homes more efficient, easier to maintain and better for our overall wellbeing.

Home is a thoughtfully designed place that feels good to be in and makes life easier: a healing space and an oasis of calm in a bustling city, where we can escape the stress of everyday life, away from noise pollution and surrounded by natural light and greenery.

9.

Relaxed, calm, comfortable homes are the future. They are simple to use and fit the way we want to live. And they have open, flexible spaces that have a strong connection with the outdoors.

Cosiness is no longer a euphemism. Interiors get a more feminine touch. Enlightened design is all about getting rid of the interior elements that cause stress, and implementing some kind of softness and welcoming warmth inside.

... INSPIRES US TO INNOVATE

We're always challenging ourselves to come up with flooring solutions that live up to your expectations and tackle the different challenges of creating, building or renovating a home. With LayRed® – our first engineered floor – we take innovation in vinyl flooring to a whole new level.

10.

01

Engineered vinyl floor

LayRed® is a multi-layered vinyl floor that combines beautiful design with supreme comfort and unrivalled strength. The clickable vinyl is engineered for the extreme: strong as hardwood and tiles, yet perfectly stable in all conditions and capable of adapting to every space, setting and challenging situation at home.

With integrated underlay

LayRed® engineered vinyl floors come with an integrated underlay. It ensures easier installation, better sound dampening and better levelling of uneven surfaces.

02

Perfect for renovation

Uneven subfloors might be a challenge when renovating a home. Not for LayRed®. Thanks to its strong core and integrated underlay, LayRed® has the ability to bridge gaps or unevenness in existing floors, making it the perfect flooring solution for your renovation project.

04

Soft and silent

03

Strong and stable

Large windows offer the beauty of abundant natural light. On the downside, the interior is subject to temperature fluctuations. LayRed® can handle this situation just fine. The floor remains dimensionally stable in all temperature conditions: no change in form due to warmth and cold.

You want the strong features of engineered vinyl but don't want to compromise on great comfort inside. No stress, with LayRed®, you don't have to. The floor has a soft and warm feel underfoot. The resilient layer and integrated underlay ensure silent acoustics: no creaking boards or annoying click-clack noises when walking. LayRed® also ensures a high transmission sound reduction. In terms of comfort, LayRed® outshines all competitors.

05

Scratch and stain resistant

Looking for a floor that can handle the hazards of everyday life? LayRed® is scratch and stain resistant thanks to a best in class TwinGuard protective layer, which protects the floor from scratches and dirt penetration, ensuring the design remains in perfect condition.

11.

12.

06

Water resistant

One great advantage of a vinyl floor is that it's water resistant. So you don't have to worry about spills and splashes. And it's ten times easier to maintain. Worry less, that's the idea with LayRed®: a floor for every space in your home, from living areas to kitchens, from bedrooms to bathrooms.

07

Beautiful designs

LayRed® looks and feels as real as nature itself. The LayRed® collection boasts 31 different colours, from oak woods to stones. All inspired by nature. And created to look extremely good: pin-sharp details, few repetitions and beautifully embossed textures.

With a touch of red

LayRed® is truly unique, a floor that boasts an array of fabulous features. But there's something else... The integrated underlay of the clickable boards comes in red, the signature of the brand. So LayRed® will inevitably be known as 'the floor with the red back'.

WITH SO
MANY
STRONG
FEATURES,
THE APPEAL
OF LAYRED®
IS OBVIOUS

- 08. Easily clickable with secure locking profile
- 09. Easy to maintain
- 10. Compatible with underfloor heating
- 11. Lifetime warranty

SO WHAT'S YOUR CHALLENGE?

- AN UNEVEN SUBFLOOR?
- A HUMID PLACE?
- A TEMPERATURE-SENSITIVE SPACE?
- PETS OR CHILDREN IN THE HOME?

LAYRED® IS DEFINITELY UP FOR IT.

UP FOR EVERY CHALLENGE

How do we develop a beautiful, renovation-friendly floor without losing the extraordinary levels of comfort vinyl floors are known for? That was the challenge. And this is a story of innovation, in which Kristof Van Vlassenrode, Moduleo®'s Head of Research & Development, plays a very important role.

Kristof Van Vlassenrode
R&D Director

The housing market is saturated and existing property needs to be renovated. This was the simple insight that started the LayRed® story. "We were challenged to come up with a vinyl flooring solution that has the ability to bridge unevenness in an existing floor, avoiding the need to level it first. So the first thing that comes to mind is that it has to be strong and rigid."

"A rigid vinyl floor with the strength of hardwood or ceramics, or a laminate covering for that matter, is not that hard to engineer. Making it strong without losing the silent acoustics and soft feel our design floors are known for, that's the real challenge." But what seemed like an impossible task at first, quickly turned into a mission 'let's make it possible'.

"We thought things through. And decided we needed more layers. A new product was born, on paper at least. To develop the multi-layered vinyl we had in mind, we needed a new production line." So seeing the huge potential in engineered vinyl, the company invested millions in a new factory facility.

"Our engineered vinyl floors live up to every expectation and tackle the challenges of renovating a home. They combine luxury design and great performance, such as wear and water resistance, with unrivalled strength and supreme comfort inside for the first time. No competitor has ever succeeded in bringing these benefits together in one product, as we are doing with LayRed®."

Needless to say, we're proud to introduce our engineered vinyl floors to the market today. "Our engineered collection really stands out. On the one hand, with its features: it's multi-layered vinyl, combining strength, comfort, design and performance. On the other – and there's the surprise – all boards come with a signature red backing: the integrated underlay." Hence the name LayRed®.

THREE BENEFITS:**

DESIGN & PERFORMANCE

Scratch & stain resistance

COMFORT

Soft & silent

STRENGTH

Rigid vinyl with integrated underlay

LayRed® consists of 12 layers, representing strength, comfort, design and performance. Twelve layers that combine to create one superbly strong, exceptionally durable product.

STRONGER THAN EVER

RIGIDITY IS ITS STRENGTH

LayRed® is rigid – in contrast to Moduleo®'s flexible design floors. The lower layers make it extremely strong and suitable for every space and setting. Yet even though it is a durable flooring solution for every home, LayRed® is above all a smart innovation for renovation projects – it is only 6 mm thick and has an integrated underlay, so you don't need to break up the old floor, just put LayRed® on top of it.

┌ 6 mm thickness (with integrated underlay)

PERFECT FOR UNEVEN SUBFLOORS

Thanks to its strong and non-telegraphing core, LayRed® has the ability to bridge gaps and slight unevenness in the subfloor (e.g. tile grouts). No levelling preparation is needed. The integrated underlay covers any imperfections, protrusions and undulations in the subfloor. And the compact layer prevents telegraphing, meaning high and low spots won't show through the surface.

levelling
uneven
subfloors

strong
core

not temperature
sensitive

STABLE IN ALL CONDITIONS

Hardwood and laminates are living floors. LayRed® guarantees no change in form due to variations in temperature (if an expansion gap is respected) or humidity. The product has no orientation thanks to the unique production process. In addition, the unique glass fibre reinforcement stabilises the core, ensuring a completely flat floor, even in a temperature-sensitive conservatory.

STRONG QUALITY, LONG WARRANTY

LayRed® is extremely durable when properly cared for. So Moduleo® gladly offers you a lifetime warranty.

STRENGTH
.01

39.

INDENTATION PROOF

Our engineered vinyl is indentation proof: the upper layer of the strong core is constructed to prevent dents from heels or furniture legs. This memory effect feature means the floor simply returns to its original state when weight or pressure is reduced.

SOOTHING THE SENSES

SENSIBLE COMFORT

One of the main benefits of a vinyl floor is comfort. But can engineered vinyl compare with more flexible alternatives? Absolutely. Your feeling of wellbeing increases considerably when walking over an engineered LayRed® floor: it feels naturally warm underfoot and reduces sound to the absolute minimum.

SOFT & WARM FEEL

The acoustic layer of LayRed® also gives you that soft and warm feel underfoot. It is resilient, so it anticipates your body weight, making LayRed® softer than all engineered alternatives.

Our material has better insulating qualities, keeping temperatures comfortable in all seasons. No cold feet for you, even on an engineered vinyl floor with a ceramic design.

LayRed® is the engineered vinyl floor with the softest touch underfoot. That makes LayRed® truly unique!

Not warm enough?
LayRed® is highly compatible
with underfloor heating.

SILENT ACOUSTICS

In a world where we're overwhelmed by noise pollution, silence is something we particularly value, especially at home. The acoustic layer in the middle softens reflective walking sound: no creaking between planks or annoying click-clack noises when walking over LayRed®. The integrated underlay also ensures a high transmission sound reduction. This is pleasant for both you and your neighbours.

The noise absorbing qualities of LayRed® are demonstrably better than hardwood, ceramic, laminate (even with a special underlay) and other engineered vinyl floor products.

Let's put it to the test...

Walking sound

LOOKS GREAT, PERFORMS EVEN BETTER

You want a floor that combines the natural beauty of a hardwood or stone floor with the practical advantages of wear resistant vinyl. LayRed® brings you the best of both worlds.

TRUE-TO-NATURE DESIGN

The LayRed® collection offers 31 in-house developed and printed designs, all inspired by wood and stone. Every design has pin-sharp details and few repetitions, making sure your floor looks as unique as nature. You'll definitely find a floor that fits your desires. The only difference is that LayRed® performs better than its natural counterparts.

NATURAL STRUCTURE

LayRed® design floors feel real. The embossing process adds a realistic texture and creates a truly authentic appearance and touch. Two lacquers are applied to give the complete surface a beautiful matt finish.

SCRATCH & STAIN RESISTANT

LayRed® beats all. With its 0.4 mm thick wear layer, the vinyl floor is truly top of the class. LayRed® is scratch and stain resistant thanks to the TwinGuard PU protective layer, which protects the floor from scratches and dirt penetration, ensuring the design remains in perfect condition.

WATER RESISTANT

Vinyl repels water and the TwinGuard PU protective layer increases that effect, making it much easier to maintain a LayRed® floor. Which means you can enjoy your LayRed® floor for a lifetime, without any worries.

REFINED 4-SIDED BEVEL

A refined tone-on-tone bevel strengthens the natural look and feel of a LayRed® floor. Every plank has its own unique bevel, adapted to the character of the wood. The tiles also have a bevel on all sides to define their contours.

PLAY IT YOUR WAY

NEW DESIGNS,
DIFFERENT FORMATS,
ENDLESS POSSIBILITIES

Are you in the mood for something truly unique?

Moduleo® Moods is a creative studio where you can combine different creative formats with a selection of stone and wood textures from the Transform and Impress ranges to create over 150 designs. From classically elegant to wildly dynamic, each oozing Moduleo®'s signature quality.

The Installation.

50.

LayRed® is a flexible solution that's easy to install. The planks and tiles can be fitted using a simple, fast click system. What's more, LayRed® comes with an integrated underlay. No hassle for you.

Engineered vinyl floor with integrated underlay

The LayRed® integrated underlay is attached to the product. It ensures easier and quicker installation, better sound dampening and better levelling of uneven surfaces. Crunching sounds due to underlying dirt or sand grains are fully absorbed.

Integrated
underlay

Our angle-angle click system offers the best technical performance on the market: the click ensures a super strong and water tight joint connection and an easy, convenient installation.

For more detailed installation instructions: visit [moduleo.co.uk](https://www.moduleo.co.uk) or scan the QR-code.

The Finishing.

52.

LayRed® is perfectly compatible with Xtrafloor® accessories: matching skirting boards and profiles for a beautiful finish.

Skirting boards

Standard skirting boards

Our standard skirting boards fit in with every interior, seamlessly connecting floor and wall. Unique patented technology ensures an identical finish between the LayRed® floor and the Xtrafloor® skirting boards when it comes to design, colour and texture. They are easy to install: glue them against the wall, effortless without clips or nails.

The identical connection with your LayRed® floor

Painted skirting boards

Just like the standard skirting boards, Xtrafloor® skirting boards are wear resistant and low maintenance, and can effectively and effortlessly hide cords and cables. Supplied ready primed, the painted skirting boards are available in two heights: 6 cm or (adjustable) 10 cm.

Match the colour of the skirting boards to your walls

53.

Profiles

Multifunctional profile

Connects your LayRed® floor to higher or lower surfaces. For height differences of up to 12 mm.

Expansion profile

Covers the dilatations joint between two connecting floors on the same level.

Adjustment profile

Connects your LayRed® floor to higher or lower surfaces. For a quick and smooth transition.

End profile

For a strong finish between your LayRed® floor and wall, raised door threshold, window or cupboards.

The Maintenance.

54.

So simple to clean and maintain, take good care of your LayRed® floor and you will enjoy it for a lifetime. The cleaning and maintenance? We leave that to you – piece of cake.

Cleaning & maintenance

Download our cleaning & maintenance instructions at moduleo.co.uk

Good cleaning and maintenance help preserve the appearance and extend the life of your LayRed® floor.

Cleaning frequency depends on how intensely the floor is used, how many people walk on it, how dirty it is and what colour and what type it is.

LayRed® floors are given extra protection by a TwinGuard PU protective layer on top of the resistant wear layer. The lacquer protects against dirt and makes cleaning easier. Thanks to the patented Protectonite technology, your LayRed® floor does not need to be pre-treated with a protective agent.

55.

CLEAN REGULARLY

Remove everyday dirt with:

- Broom
- Duster
- Vacuum cleaner

Remove stains with:

- Moist cloth
- Absorbent pad (not a scourer)

Mop with:

- Moist micro-fibre mop
- Regular mop (as dry as possible)
- A non-aggressive cleaner like Xtrafloor® (www.xtrafloor.com)

Ask your Moduleo® retailer for more information about our Xtrafloor® maintenance solutions

 **moduleo**
Design Floor by

Enterprising with an eye to the future, producing with an eye for quality

Moduleo® sets the standard for future generations of luxury vinyl floors. On the one hand, it combines sustainable production with the ease of installation and maintenance of vinyl floors. On the other, Moduleo® truly stands out because of its range of designs and innovations.

58.

With a diverse range of durable, stylish products and the convenience of an all-in floor solution, as well as excellent customer service and unparalleled 'green' credentials, Moduleo® is proud to be different.

Moduleo® is produced in our vertically integrated factory in Avelgem, Belgium, which is specially constructed to enable us to produce flooring in a responsible manner. In addition, we have a fully automated warehouse on site with the capacity to

store 2,000,000 m² of Moduleo® flooring. Not only are a large number of energy-saving and waste reduction measures in place in our factory, unlike other producers we have full control over the design, production and logistics process. This allows us to retain total control, every step of the way.

Moduleo® is the residential luxury vinyl floor brand of IVC Group, a world leader in the development and manufacture of vinyl floors.

Since 2015, the IVC Group has been part of Mohawk Industries Inc., the world's market leader in flooring.

Eco is so logical, we believe it goes hand in hand with the economy

Choosing Moduleo® is making an eco-friendly choice for the future. Working from our very own purpose-built, eco-friendly production plant in Avelgem (Belgium) is just one of the ways we are doing things differently, but it is our most important contribution to a more beautiful environment.

Green energy production

Our factory in Avelgem (Belgium) is equipped with three wind turbines that fulfil the strict health and safety standards for noise and visual pollution. The turbines can generate up to 13.3 GWh/year (equivalent to the annual consumption of over 2000 households) and provide one third of the factory's energy needs.

Ingenious cooling system

During the manufacture of quality vinyl floors, cold water is required to absorb heat during the various production phases. We've devised an original solution for this, which uses the water of the nearby Scheldt River as a secondary coolant. Using minimal energy, the river water is pumped into the closed loop system of the cooling water for the installations.

Use of recycled material

Moduleo® floors contain up to 50% recycled material of verified origin, and are themselves recyclable. Post-industrial recycling also enables us to obtain an especially pure type of PVC with a limited impact on the environment. Furthermore, we are always looking for new ways to package products and limit waste.

Made in Belgium quality

By manufacturing our products as close to the customer as possible, we minimise the impact transportation has on the environment. This helps to keep CO₂ emissions and our ecological footprint to a minimum.

If you are looking for a sustainable flooring solution, think of Moduleo® first!
